Endpoint Security	Penetration Testing	Security Operation Centre

## Benefits for your Business

- As your managing service provider, we maintain your IT infrastructure, by increasing your system **stability and reliability**, by reducing downtime with patch management and daily health checks.
- Real-time data analyses using advanced scanning technology powered by AI allow **Advanced threat protection** whether on or offsite.
- System Insight provides **visibility** into your security postures with Real-time pattern threat recognition leveraging various filtering technologies to capture known, emerging and targeted attacks.
- Secure Data with Full endpoint **security** to enhance data recovery against ransomware attacks.
- **Backup** to store email beyond your primary email service retention period with encrypted, long-term email archiving – Long-term mail archiving reduces the chances of customer data loss.
